

The CO10S is a normally open roller shutter contact. N/O functionality is provided by a changeover reed. Wire selection can turn this contact from N/O to N/C if necessary.

INSTALLATION:

Drill appropriate fitting holes for both contact & magnet in the mounting surfaces. Wire the contact as follows:

Always wire the common wire. Choose whether to wire the N/O or N/C wire depending on the link of output you require from the contact.

When wiring is to the desired specification, fit the contact to the mounting holes using the screws provided. Ensure that contact & magnet align as well as possible to ensure reliable operation.

OPERATING GAPS:

Make: 55mm Approx
Break: 80mm Approx
