

The E90ANO is a mini surface contact in an aluminium casing. The internals of the contact are sealed for durability & environmental resistance.

NOTE:

E90ANO is a *normally open* contact – The reed circuit will open in presence of the magnet and close when the magnet moves away.

INSTALLATION:

Drill appropriate fitting holes for both contact & magnet in the mounting surfaces. Wire the contact as follows:

When wiring is to the desired specification, fit the contact to the mounting holes using the screws provided. Ensure that contact & magnet align as well as possible to ensure reliable operation.

OPERATING GAP: 15mm Approx
