Description

The END74 is a surface mount contact with integral tamper switch. It can be wired in traditional or fully supervised (EOL) formats and benefits from installer selection of End of Line and Alarm contact bypass resistors.

Installation

Fix the contact to the mounting surfaces using the screws provided. The Pcb must be inserted with the TACT switch spring in the centre of the case length. The reed and magnet centres should be aligned, by the case arrows.

Operation

The contact will operate with a gap of 35-40mm between the magnet and reed.

Wiring

Traditional (4 Wire) – Ensure no jumpers are fitted. Use all four terminals as marked.

Supervised (EOL) – Fit the appropriate jumpers for the control panel (See Table). Connect the loop wires to the terminals marked •

Other – Some applications may not require both resistors. In these cases fit jumper(s) in EOL or Alarm position as appropriate

Industrial Surface Magnetic Contact with Selectable Resistors

Part Code: END74

Security Grade 2 Environmental Class 2

Manufactured to BS EN50131-2-6

Control Panel	EOL Value	Alarm Value	Diagram
Honeywell Ademco	1KR	1KR	
Scantronic, Menvier Texecom, Pyronix Castle	2K2	4K7	
Aritech	4K7	4K7	
Gardtec	4K7	6K8	
Guardall	8K2	8K2	
DSC	5K6	5K6	
Fit Jumpers in Shaded Positions			

Note this contact already meets the requirements of TS50131-2-6: 2004 g2.
